Ashraf Hebish

Aspiring AI & Data Scientist | AI & Data Science Student

Damietta, Egypt | ashrafhebish23@gmail.com | linkedin.com/in/ashraf-hebish-b16370360 | Portfolio | github.com/ashrafhebish

Professional Summary

Aspiring AI & Data Scientist and AI & Data Science student at Horus University, Egypt, with a diploma in AI & Data Science from Arabian Academy (Excellent). Builds data-driven applications in Python and JavaScript, from a linear regression house-price model to a 12-phase statistical analysis pipeline written without external statistics libraries. Certified by Google, IBM and Microsoft in AI, data science and generative AI, with hands-on Power BI reporting.

Technical Skills

Programming:	Python, JavaScript, HTML, CSS, Java
Data & Analytics:	Data Cleaning, Data Visualization, Power BI, Descriptive Statistics, Hypothesis Testing, Confidence Intervals, ANOVA, Numerical Methods
Machine Learning:	Simple & Multiple Linear Regression, Model Evaluation (MSE, RMSE, MAE), Residual Analysis
AI:	Generative AI, Large Language Models, Prompt Engineering, Responsible AI, Encoder-Decoder Architecture
Tools & Other:	Git, GitHub, GitHub Pages, Chart.js, Microsoft Copilot, Responsive Web Design, Digital Logic Design

Projects

Smart Regression System | *JavaScript, Machine Learning* Live Demo

- Built a house-price prediction app that trains simple or multiple linear regression on a 200-row sample or any uploaded CSV, reporting MSE, RMSE and MAE with coefficients, residual plots, a correlation matrix and new-price predictions.

Statistical Analysis Pipeline | *Python, JavaScript* Live Demo

- Built a pipeline that auto-detects CSV column types and runs 12 analysis phases, with descriptive statistics, confidence intervals, t-tests and ANOVA implemented by hand in Python (no SciPy).

Numerical Methods Lab | *JavaScript, Chart.js* Live Demo

- Team project (10–12 students): interactive lab for six numerical methods (Bisection, False Position, Newton-Raphson, Secant, Thomas, Jacobi) with live convergence charts; presented at the Faculty of AI *Best Numerical Methods Calculator* competition (May 2026).

Smart Budget | *Python, JavaScript, HTML, CSS* Live Demo

- Built a monthly budget manager (50/30/20, 60/20/20 or custom ratios) that tracks spending against the plan; ported from Python to an offline JavaScript app with reports and CSV export.

Digital Logic Security System | *Digital Logic, Hardware*

- Designed and built a logic-gate access-control prototype that compares a 4-bit code with a key code using XOR/NOR gates and shows the result on LEDs; wired and tested on a breadboard.

Education

Horus University in Egypt
B.Sc., Artificial Intelligence & Data Science *2024 – 2028 (Expected)*

Arabian Academy | *Diploma, AI & Data Science (60 hours, Excellent)* *Jul 2026 – Sep 2026*

Certifications

- **Google (Coursera):** Google AI Essentials Specialization (5 courses) • AI Fundamentals 2026
- **IBM:** What is Data Science? • Data Science Orientation • Data Fundamentals • Introduction to Data Concepts • Cloud Computing Fundamentals • Journey to Cloud 2026
- **Microsoft & LinkedIn:** Career Essentials in Generative AI (Learning Path) 2026
- **Coursera Project:** Power BI for Beginners: Build your First Report 2026
- **Edraak:** Data Science & Machine Learning • AI in the Workplace • Data Visualization for Decision-Making 2026
- **Other:** Introduction to Large Language Models (Google Cloud • Simplilearn) • Claude 101 (Anthropic) • Java IO and Network Programming (Mahara-Tech, ITI) • Encoder-Decoder Architecture • One Million Prompters
